Summary

Results-driven Artificial Intelligence and Data Science undergraduate (CGPA: 9.63/10) with a strong foundation in machine learning, statistical modeling, and data engineering. Proven track record in designing high-accuracy predictive models, automating workflows, and developing scalable AI applications. Adept at transforming complex datasets into actionable business insights and eager to leverage technical problem-solving skills to drive data-centric solutions.

Education

VES Institute of Technology (VESIT)

B.Tech in Artificial Intelligence & Data Science | CGPA: 9.63/10

Mumbai, MH

Aug 2024 – Present

B.N. Bandodkar College of Science

Higher Secondary Certificate (HSC) | 86.67%

Thane, MH

Jun 2022 – Apr 2024

A.K. Joshi English High School

Secondary School Certificate (SSC) | 94%

Thane, MH

Jun 2012 – Apr 2022

Experience

ISTE VESIT

Junior Technical Officer

Mumbai, MH

Jul 2026 – Present

- Managing technical events, workshops, and community development.

Tata Consultancy Services

Data Analyst Intern – GenAI Powered Data Analytics

Virtual

Summer 2026

- Leveraged Generative AI architectures for complex data cleaning configurations and exploratory data analysis (EDA).
- Synthesized business trend datasets to formulate strategic visual dashboards for corporate insight groups.

Projects

Nexus Developer Onboarding Agent | React.js, Node.js, ChromaDB, Generative AI

2026

- Engineered an enterprise-grade autonomous onboarding platform accelerating engineering integration.
- Dynamically adapted learning paths and resources based on real-time technical proficiency and cognitive metrics.

Email/SMS Spam Detection System | Python, NLP, Scikit-learn, Streamlit

2025

- Developed a 97% accuracy classification model using NLP and Logistic Regression.
- Engineered a Streamlit interface featuring live text prediction and real-time visualization of performance metrics.

Prashikshan – NEP Internship Management Platform | React.js, Node.js, MongoDB

2025

- Designed a data management platform for internship discovery, logbook monitoring, and compliance analytics.
- Implemented database schemas and dashboards for tracking applicant progress across industry partners.

Technical Skills

Languages: Python, Java, Dart, JavaScript

AI/ML: NLP, Generative AI, AI Agents, RAG, Deep Learning, LLMs

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Excel, SQL, PowerBI

CS Fundamentals: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, OOP

Frameworks & Tools: React, FastAPI, LangChain, LangGraph, Streamlit, Git, GitHub, Google Colab, Canva

Achievements

- 3rd Position (Zerve AI Datathon 2025):** Showcased predictive analytics skills alongside team Bharat Bytes.
- Finalist (PU Code Hackathon 3.0):** Built a Telegram-based Grievance chatbot for VMC within 36 hours.
- HackerRank 4 Star Badge (Python):** Demonstrated strong proficiency in Python data structures and algorithms.

Certifications

Oracle: Artificial Intelligence and Machine Learning in Java

IBM: AI Literacy, AI Fundamentals

Udemy: Data Science, Machine Learning, DL and NLP Bootcamp, Ethical Hacking
